## Features

#### With the plus for your meetings.

The Kindermann Touchdisplays offer you the latest technology for interactive meetings and workshops. The integrated Android operating system and an intuitive home screen ensure that you can find your way around in no time at all.

All important functions, such as the **annotation screenshot function**, are available to you at any time.

#### Start immediately.

Ambient light sensor

(video, touch and charging function)

& blue light filter

Front ports:

NEW: USB-C

Once configured, the displays switch on and off automatically. This means the meeting can start without delay and unnecessary power consumption can be avoided.

NEW: Future-proof: Powerful processor, large memory

40 touch points

Screen sharing via dongle, App, AirPlay & Chromecast

OTA updates

Android 9

Remote Display Management (Chimpa) 1 year subscription free of charge

Antibacterial coate diffuse front glass Antibacterial coated,

Zero Gap - no gap between panel and front glass

### Your meeting starts - now!

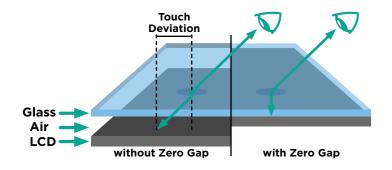

0 6

Touchdisplays that work simply and immediatly - without user training needed, without superfluous functions, without ifs and buts.

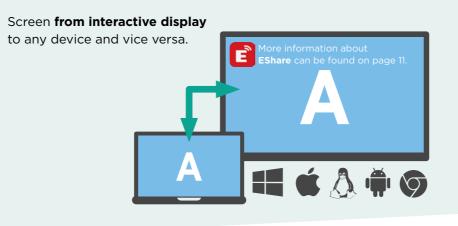

## Feature Highlights

## Zero Gap Technology

No empty space between touch and LCD panel to reduce optical break-up and improve readability, contrast and accuracy of the touch input of the display.

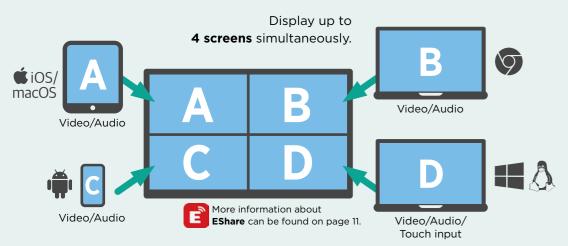

## **Screen Mirroring**

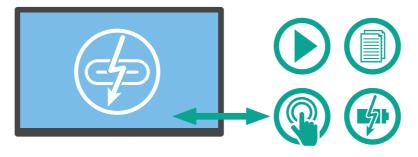

## Splitscreen

## **USB Type-C connector**

Video, touch and charging... with just one cable.

The connections are quickly and easily accessible on the front of the display.

## Connections

### **3** Side connections:

USB3.0	US83.0	HDMI2	HDMIT	DP	US82.0	TOUCH-USB	LAN	LAN
and the second second	<u></u>							100
							S. 2	100

### **4** Bottom connections:

### **G** OPS-PC installation module

Detailed technical data of the Touchdisplays can be found under: <u>bit.ly/3JzGVim</u> or <u>touchdisplays</u> touchdisplays.eu/en/

#### Connectivity first...

The Touchdisplay offers the necessary inputs and outputs for every situation!

# Apps

Quick access to all video inputs, a preview function makes it easier to select the correct input.

### • Firefox - web browser

WPS Office - for viewing and working with Word, Excel and PowerPoint files

- Open Camera for displaying live camera and Visualizer images
- Adobe Reader for viewing PDF files
- VLC powerful video and audio player

the results

• Share the results

#### The Kindermann Touchdisplays also support Windows Ink.

This means that the passive pens are recognised as an active Windows Ink pen which allows you for example to draw directly into a PowerPoint presentation without having to select the tool.

#### Kindermann **Touchdisplays**

#### **Dashboard - Home**

Home screen with the most important functions at a glance.

#### Search function

In the browser and dashboard.

Quick access to the main functions

#### 🚯 Status bar

Shows the connection types currently in use.

#### 4 Favourites

Quick access to apps and settings.

#### Sidebar

**User Interface** 

Via the **sidebar** you have quick access to all frequently needed functions.

#### **Dashboard - Connect**

#### **Dashboard - Search**

Search works both locally for files and apps, but also directly online.

#### The Control Center

offers quick access to the most important and most frequently used settings.

Via the app **menu** you have access to your favourites apps, the running apps and a selection of helpful tools, such as calculators. screen recorder, etc.

# In meetings, every minute and every contribution counts!

#### Share content wirelessly from mobile devices.

No time to waste - you connect your device via EShare and within seconds you are able to mirror your screen content. The same also applies for other participants, regardless of the end device (laptop, tablet or smartphone) and operating system. The displayed content can be annotated without any problems.

#### The result

The active participation increases attention and thus better results.

### New!

**HDMI / Type C dongles** for screen sharing without software - also for retrofitting existing systems.

## Chimpa RDM/MDM

Workflows and automatic usage alerts can be set up: Every time an action is performed on the display, a notification can be released.

## The most important features of Chimpa

#### **Distribution of apps and content**

With Chimpa you can distribute apps, documents, individual APKs, settings and updates via the browser. In the Chimpa Admin Panel you can access public app stores or cloud services such as Google Drive, Dropbox and OneDrive. You can send documents to all or only some managed devices.

#### Kiosk mode and single app mode

6 Thanks to Chimpa, the interactive flat screen can be set to a specific home screen for your Company. In kiosk mode you can grant rights of use for applications.

Chimpa Remote Display Management has been specially developed for interactive

displays as a solution for remote management. Thanks to its advanced features and

versatility, the Chimpa RDM can be used in various application areas!

#### **Profile management and restrictions**

With Chimpa RDM, you can manage company-wide profiles and specific restrictions on a per-device or per-time basis.

Chimpa protects your organisation from inappropriate use.

#### Monitoring and remote support

Chimpa RDM can monitor hardware and software usage, record and report any deviations. In addition the administrator can interact with the display as if he/she were physically present.

This means that it is possible to provide technical support and maintenance remotely.

#### User-friendly

A clear and intuitive user interface makes it easy even for beginners to manage the displays.

#### Secure

- It protects your organisation from inappropriate use of the mostly publicly accessible devices.
- · Hosting in Europe, DSGVO compliant.

Complete management

With Chimpa MDM you have full control over the devices in your organisation.

Customisable

The solution is configurable according to your needs and type of use.

from date of purchase 01.01.2022

Licence extension on a yearly basis or with **3 or 5 years** are optionally available.

Chimpa can also be used as a **mobile device management** (MDM) solution for tablets and smartphones.

Please do not hesitate to contact us for **individual advice**.

## **KLICK&SHOW** K-FX and K-40 Series

## **BYOM - Video conferencing** in the meeting room

## Teamwork and how we interact with colleagues has changed.

Bring Your Own Meeting (BYOM) is the logical consequence of the modern working way. Hybrid teams are now the order of the day and new concepts are needed for spontaneous video meetings. Every meeting room or huddle space should be used for this purpose in the simplest way possible.

And this is where KLICK&SHOW K-FX comes into play. Video soundbars, cameras and speakerphones can be used easily and wirelessly with the notebook.

## The perfect complement to your Touchdisplay

<

KLICK&SHOW K-FX series:

Mores

## **BYOD - classic presentation**

#### Mobility starts where the cable tangle comes to an end.

No more missing cables, wrong interfaces and delays in meetings. KLICK&SHOW offers staff and guests the freedom to present their content wirelessly, regardless of the device they are working with.

And in the simplest way possible, without complicated configuration, software installation or time lost.

Simply start the app or plug in the transmitter and present.
